SKILLS

- Programming Languages and Frameworks: C# and .Net
- Frontend technologies and languages: HTML, CSS, JavaScript, React, Redux, Angular, TypeScript
- English: Level B2

MY PROJECTS

Uni Scheduler

- Goal: help student create custom schedules where they can list all of their classes and facultative courses.
- Client: <https://github.com/RuslanAFK/scheduler.client>
- Framework: Angular with NgRx state management: and Bootstrap styles.
- Server: <https://github.com/RuslanAFK/scheduler.server>
- Technologies: Asp.Net Core with JWT custom authorization, SQL database.

Bookstore

- Link: https://github.com/RuslanAFK/bookstore_dotnet
- Goal: make easier the process of finding books on Internet.
- How it works: Admin can load, update and delete book info. User can only read that info. Creator can change user roles and delete them.
- Technologies: React with Redux, Asp.Net Core with role-based asymmetric JWT authorization.
